Sir:

Applicants submit herewith a substitute Computer Readable Form of the Sequence Listing and a substitute Paper Copy which comprises the nucleotide and amino acid sequences contained in the application as originally filed. Applicants amend the Sequence Listing previously provided to include an amino acid sequence which was inadvertently omitted from the original Sequence Listing. The amino acid sequence occurred on page 22 at line 15 of the published International Application. Pursuant to 37 C.F.R. § 1.821(e), the substitute paper copy and the substitute computer readable form are identical. Applicants also state that no new matter has been added pursuant to 37 C.F.R. § 1.821(f).

IN THE SPECIFICATION

Please remove pages 1 – 8 which contained the previously submitted Sequence Listing and replace them with pages 1 – 8 which contains the revised Sequence Listing.

Respectfully submitted,
